HyungRyul Kim

Email: dev.ryulth@gmail.com
Contact: 010-9455-9654

I am a **backend developer** who wants to create a service that parents can use easily.
I enjoy applying technologies that I have not experienced to side projects.
Currently, I like **Java & Kotlin** and **Spring Framework**.
RDB prefers **MySQL** and **NoSQL** prefers **DynamoDB**.
Always worry about side effects not happening.

Main technology stack: Java, Kotlin, Spring Framework, MySQL, Docker, DynamoDB
GitHub: https://github.com/Ryulth
Curriculum Vitae: https://ryulth.com/cv-ko.pdf
Side Project: https://ryulth.com/side-project-ko.pdf

Work Experience

HYPERCONNECT   Nov 2019 - Present
Full-time, Seoul, Republic of Korea - https://hyperconnect.com/?lang=en
